

Intelligent Mixer

BEVS 2506

Introduction:

The BEVS 2506 Intelligent Mixer adopts advanced touch screen control design, and the frequency converter regulates the motor speed. Different discs can be used for dispersion, mixing and grinding. The speed (RPM), dispersion, mixing and grinding time can be set through the touch screen interface, which is an ideal choice for research and development, laboratory and field test.

Application:

It is widely used in industries including coatings, dyes, inks, pigments, papermaking, cosmetics, food, resins, adhesives, emulsions, medicine, petroleum, pesticides, daily chemicals and others.

Technical info:

- Maximum mixing volume: 10 L, supported vessel: 1.5/3/5/10 L
- Running time adjustable
- Motor: FM high-speed motor
- Safety clamping sensing function (only run while vessel is fixed tightly)
- Power: 750W
- Explosion-proof type (optional)

- Touch screen control
- Speed: 500 - 12000 rpm
- Lifting system: automatic lifting, stroke length 300mm

Order info:

BEVS 2506 Intelligent Mixer, disc and vessel pls refer to BEVS 2501 series.
