

## Wet Film Gauge(Aluminum)

### ■ Introduction:

The gauge is used to measure the wet film thickness of wet film coatings on smooth and flat surfaces, especially in protective coatings, putty, automobile anti-gravel paint, etc.

### ■ Technical info:

Measuring Range: 25-2000 $\mu$ m  
Size: 89 $\times$ 66 $\times$ 0.8mm

### ■ Standard :

ASTM D4414, ISO 2808, GB/T 13452

### ■ Order info :

BEVS 1701/3 Wet Film Gauge 25-2000 $\mu$ m
