

## Color i<sup>TM</sup> Match

### Color Formulation Software

An intelligent solution for formulating paint, plastics, or textiles. This package enables quick, accurate color analysis and the capability to optimize every formula for cost and color accuracy. Available in four levels for specific formulation requirements.

# Color iMatch Advantages

- **Document Based Architecture - eJobs.** A method of accumulating, storing, and retrieving job data in a single folder or container that simplifies task management and color communication
- **Configurability.** Desktops can be created for specific user requirements and software levels, improving efficiency and making it easy to adapt to unique requirements
- **Connectivity.** A remote output feature allows the user to tailor and format any color data and to seamlessly share this data with color partners
- **Data Management.** An integrated account management system enhances organization and data protection
- **Traceability.** Every measurement, colorant, and collection is created with a GUID that identifies the object for its entire life
- **Color Matching.** Multiple match engines increase color formulation latitude while improving accuracy and reducing errors
- **Colorant Tags and Rules.** Dynamic Industrial Formulation System (IFS) and automatic colorant selection simplifies operation and improves overall quality
- **NetProfiler® Enabled.** An option that enables all spectrophotometers to measure consistently from a single remote location

## Color iMatch Online Edition

Reduce system administration by as much as half with this centralized control option that operates without the need for local software installation. Connections are possible using desktops or e-mail and data access is managed by user or function, providing for precise, accurate flow of color data.

General Features	Color iMatch				Formulation Features	Color iMatch				
	Basic	Standard <sup>1,2</sup>	Professional <sup>1,2</sup>	Satellite		Basic	Standard <sup>1,2</sup>	Professional <sup>1,2</sup>	Satellite	Contractor

<sup>1</sup> Manager Version – Add-on to any existing full system. It lets you work with color data without having an instrument. (Must have a full system installed.)

<sup>2</sup> Online Edition – Online alternative to Color iMatch Satellite. Install any system locally and access full functionality remotely via the internet.

## X-Rite: Your source for accurate color. On time. Every time.

X-Rite is a world leader in providing global color control solutions for manufacturing and quality management requirements.

We lead the industry in offering service options to ensure uninterrupted performance of all X-Rite products. Training and educational resources are available globally and online for both new and experienced users to optimize their color measurement capabilities.

Visit [xrite.com](http://xrite.com) for more information about X-Rite products. X-Rite customers worldwide may also call the Applications Support team at [CASupport@xrite.com](mailto:CASupport@xrite.com) or Customer Service at 800-248-9748.
